MY PORTFOLIO

Hi, I'm Revathi 👋

An aspiring Data Analyst passionate about exploring data, finding patterns, and creating impactful dashboards. Skilled in SQL, Python, Excel and visualization tools , I aim to bridge data and decision-making.

ABOUT ME

I am Revathi, an aspiring Data Analyst and UI/UX Designer.

I have a strong foundation in Python, SQL, Excel, Power BI, and Tableau, with hands-on experience in creating dashboards and analyzing data to uncover insights.

Along with analytics, I enjoy designing user-friendly interfaces and prototypes in Figma, blending creativity with problem-solving. My focus is to present data and designs in ways that are clear, engaging, and impactful.

I aim to grow as a professional who can combine data-driven decision-making with intuitive design to create meaningful solutions.
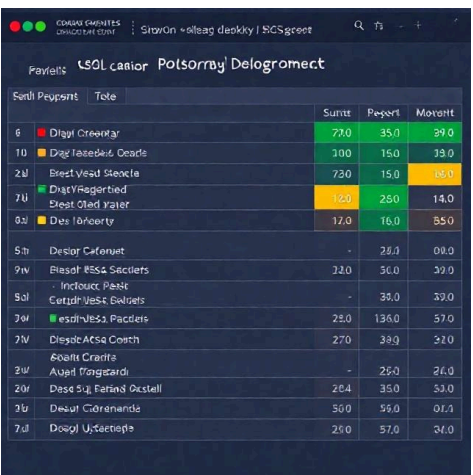

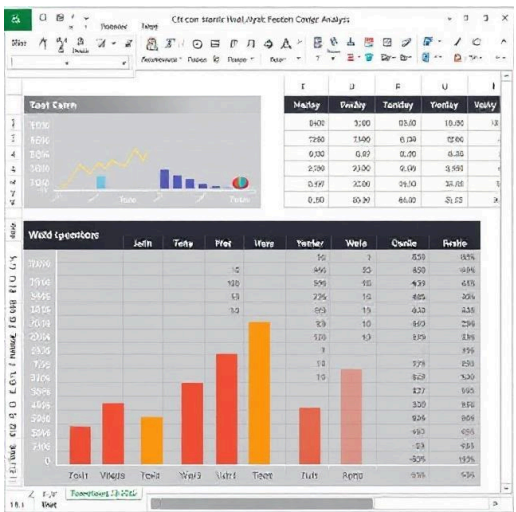

some of my recent works

PROJECTS

Sales Dashboard

Built an interactive dashboard to track sales, revenue, and KPIs using Power BI.

Procurement Analysis

Optimized SQL queries to validate seasonal procurement data and generate actionable insights.
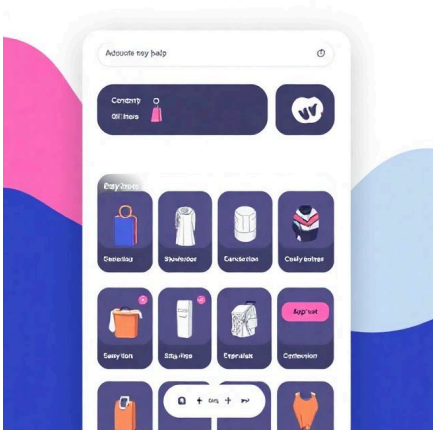

Churn Analysis

Used formulas, pivot tables, and charts to analyze churn and provide retention-focused insights using MS Excel.

Covid Data Analysis

Cleaned and analyzed data with Pandas & NumPy, visualizing patterns via Power BI dashboards.
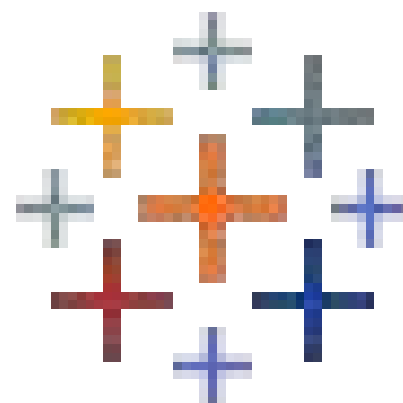

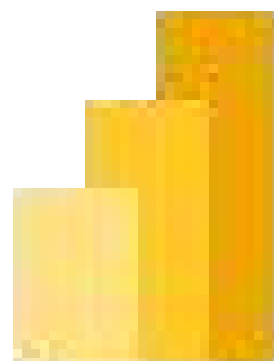

E-Commerce UI

Figma prototype for Modish Men, a men's fashion app, showcasing the complete user flow from browsing products to order confirmation.
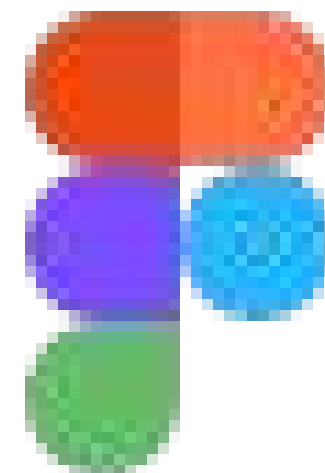

MY SKILLS

Data Analysis

Data Visualization

UI/UX Design
